Summary: Product Designer with a foundation in UX and business strategy, designing solutions that satisfy business needs and user needs at once. Comfortable collaborating across business, design, and engineering, with AI built into the process.

Skills: Figma, User Research, Design Systems, Branding & Identity, Storytelling, AI Prototyping

EDUCATION

User Experience Design - BS	*Western Governors University*	Oct 2025
Communication Studies - BA	*San Francisco State University*	May 2024
Holistic Health - Minor	*San Francisco State University*	May 2024

EXPERIENCE

EZ Brow & Beauty February 2025 - Present

Design Lead |Figma| |Case Study|

- Initiated a brand identity and product UX foundation for a long-standing family-run business with no existing design brief, independently defining strategy, direction, and scope through market research and direct observation of the business's digital gaps, existing client behavior, and brand identity constraints.
- Directed the redesign of the brand's visual identity through stakeholder alignment and market analysis, shipping a full design system with color and typography scales, spacing tokens, and 30+ component masters alongside a redesigned service architecture and a preserved, clarity-layered booking flow.

PROJECTS

PropertyPixel | AI Real Estate Media Platform March 2026 - Present

Product Designer |Case Study|

- Identified UX gaps in an AI-native SaaS product through user analytics (PostHog), competitor research and hands-on usability testing - surfacing landing page, studio-experience, and deeper workflow-level UX issues.
- Redesigned the landing page and core studio experience to improve clarity and guide user interaction, resolving the identified issues; redesign shipped to production and is currently live, with iterative improvements ongoing in collaboration with the founder.

CERTIFICATES

International Permaculture Design Certificate (PDC) September 2021

HASERA Agriculture & Research Center

- Hands-on design course at a working permaculture farm, covering natural, social, and agricultural system analysis, observation and mapping, and zone and sector planning, with design presentations and peer feedback.
